MOVING RESPITE FORWARD

The International Short Break Association (ISBA) is a worldwide initiative made up of agencies and organisations providing health care and respite services for families caring for a child and adult with disabilities. Their work is inclusive and responsive to the needs of the individual with a disability and their families.

ISBA exists to provide the opportunity to acquire knowledge and experience of Short Break Care, also known in the U.S. as respite care, across national and cultural boundaries. We want to create professionals that enhance respite services with the aim of ensuring stable families who are able to keep their family members living at home and in the community.
